

Cable Ties for food industry, detectable, corrosion resistant

MCTS-Series

Our MCTS cable ties have been specifically developed to be used in the food & beverage as well as in the pharmaceutical industry. A unique manufacturing process in combination with a unique material formulation is offering outstanding performance in line with high corrosion resistance. This makes the MCTS an ideal product even for very humid environments. In addition the MCTS ties manufactured from a polypropylene base material are offering very good chemical resistance.

Features and Benefits

- Total metal dispersion throughout the tie
- Available in different sizes and colours
- Supports quality processes around the production of food stuffs
- Blue colour most common for easy visual detection
- Greatly reduces risk of contamination
- Magnetic and X-Ray detectable (detection level depending on specific application)
- MCTS ties have very good corrosion resistance

Our detectable MCT(S) cable ties used in the food and pharmaceutical industry.

**More colours on request.

For more information on toolings please refer to the Application Tooling chapter.

*HACCP stands for Hazard Analysis Critical Control Points. It is a method of identifying and eliminating potential hazards in food production. Those hazards that cannot be eliminated are controlled in such a way that the consumer is protected. These controls are known as Critical Control Points (CCPs). They are CRITICAL because if they fail or are not carried out, the risk of the product harming the customer increases.
