

3x3, 4.8 dB hybrid coupler 7406.17.0002

Hybrid Coupler

Description

A 3x3 hybrid combiner is a network which combines up to three inputs. In DAS applications, all three outputs may be used to feed different cables, essentially providing lossless combining. Any unused ports must be terminated in 50 Ohm at the appropriate power rating. This network is an important building block in combining boxes used in neutral host in-building DAS.
