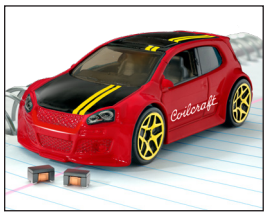
Featured Products

XGL4020 Ultra-low DCR Power Inductors 22

- Lowest DCR currently offered in our 4020 size, with extremely low AC losses for a wide range of DC-DC converters (up to 5+ MHz)
- Twelve L values from 0.33 to 8.2 µH, with current ratings up to 15.2 Amps
- AEC-Q200 Grade 1 Qualified (–40°C to +125°C)

1812CANbus Common Mode Chokes 48

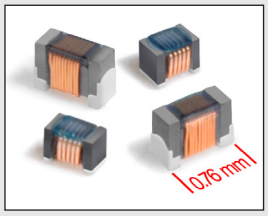


- Designed for noise suppression on CAN (1 Mbps) or CAN FD (5 Mbps) data lines
- Also suitable for the FlexRay® automotive bus system
- Inductance values from 11 to 100 µH
- 50% lower DCR and higher current handling than other CANbus chokes

XAL7050 Series High-current Molded Power Inductors 22

- High inductance – up to 47 µH
- Current ratings up to 5.5 Amps with soft saturation to withstand high current spikes
- AEC-Q200 Grade 1 (–40°C to +125°C)
- Composite construction minimizes audible buzzing

Wirewound Ferrite Beads



Coilcraft wirewound ferrite beads offer a high magnitude of attenuation across a wide frequency range. Choose from eleven families in standard package sizes from 0201 (0603) to 1812 (4532), all offering better attenuation and frequency performance than traditional thick-film chip ferrite beads.

Ferrite beads are used as low-pass filters to eliminate high-frequency noise while allowing low-frequency signals or DC current to pass through a circuit.

Learn more on page 54.

AEC-Q200 qualified products

are identified throughout the catalog with icons.

Q200 125° AEC-Q200 Grade 1 qualified

Q200 85° AEC-Q200 Grade 3 qualified

For additional information, please contact us for our *Magnetics for automotive electronics* brochure.

Chip Inductors

S-parameters & SPICE models
Available on our web site

Coilcraft chip inductors cover the range from 0.5 nH to 1,000 µH. All except the AF, DF, LS, 026011F and 0402FL Series are wound on ceramic bodies and offer exceptionally high SRFs, high Q and tight tolerances. Many parts are available with inductance tolerances as low as 1% at only a small premium. Coilcraft offers **Designer's Kits** that contain samples for prototyping. See page 55 or order on-line at **http://www.coilcraft.com/kits**.

Which chip inductor family should you use?

	Ceramic (SUFFIX, BODY SIZE)				Ferrite (SUFFIX, BODY SIZE)		
Highest Q	DC 0402	HP 0402-0805	HQ 0403-1008	CS 0402-1812	LS 0603-1812		
Lowest DCR	DC 0402	HP 0402-0805	DS 0201		DF 0402	AF 0201-1008	LS 0603-1812
Highest current	HP 0402-0805	PA 0402	HC 0603		DF 0402	AF 0201-1008	LS 0603-1812
Highest L	HL 0201-0603				DF 0402	LS 0603-1812

Air Core Inductors

RoHS COMPLIANT

S-parameters & T-Line models
Available on our web site

These tight tolerance surface mount air core inductors combine the exceptionally high Q of an air wound coil with the convenience of surface mounting. Their flat top makes them suitable for automatic placement and reflow or vapor phase processing. Solder coated leads ensure reliable soldering. The **Square Air Core Inductors** are available in seven sizes and offer Q factors up to 230 and current handling as high as 5.7 Amps. The **GA309x** Inductors have high current ratings and low DCR. The **VS Series** have the highest current ratings and the lowest DCR. These inductors are the perfect solution for high-current IF/RF applications that require non-magnetic parts.

Small Square Inductors

Part number	Inductance ±5% (nH)	Percent tolerance*	Q typ	Test freq (MHz)	SRF typ (GHz)	DCR max (mOhms)	Irms (A)

* When ordering, please replace underscore in part number with the proper tolerance code: F = 1%, G = 2%, J = 5%, K = 10%. (e.g. B10T**G**LC for a 2% tolerance part.)

Wideband Bias Chokes

Coilcraft BCR and BCL conical inductors offer a flat bandwidth with high impedance to 40 GHz, and are ideal for use in bias tees. The BCR has a full-length cap that fully protects the coil and provides a large surface for pick and place. The BCL has "flying leads" that allows adjustment of the mounting angle. The 4310LC has a flat bandwidth to 6 GHz, making it the perfect solution for lower bandwidth, high power applications.

BCL Conical Inductors

Part number	Inductance ±5% (µH)	Bandwidth	DCR max (Ohms)	Irms (A) 40°C rise

SM RFID Transponder Coils

These Coilcraft transponder coils are designed for RFID applications at 125 kHz. The 4312RV and 5315TC were designed to withstand harsh mechanical shock and are well suited for use in tire pressure monitoring systems.

Shielded SM Power Inductors

SPICE models Available on our web site

Coilcraft offers a wide variety of miniature surface mount inductors for DC-DC conversion and other power applications. If your application requires magnetic shielding, consider our PFL, EPL, XGL, XEL, XAL, XFL and LPS Inductors, or other families of shielded and toroidal inductors. The all-new **XGL and XEL Families** offer extremely low DCR and ultra-low AC losses for high switching frequencies (2 to 5 MHz). For high current applications, our SER, SLC, SLR and MLC flat-wire inductors combine high Isat ratings (>100 Amps) and exceptionally low DCR for greater efficiency. Our LPD, PFD and MSD Series of coupled inductors are suitable for SEPIC applications and can also be used as 1:1 transformers, common mode chokes (see pages 50 and 51) and two separate inductors. Unshielded power inductors are shown starting on page 37. **Designer's Kits** are available for many products to simplify your prototyping. See page 55 and order on-line at **http://www.coilcraft.com/kits**.

Through-Hole Power Inductors

Coilcraft through-hole power inductors offer a wide range of inductance values and current ratings in a variety of sizes. These efficient, low-cost inductors are intended for DC-DC converters and are suitable for many other power and filtering applications. Body sizes are as small as 8 mm diameter (DR0608) with heights ranging from 8 mm to 16 mm. Inductance values range from 0.9 µH to 18 mH. The RFS Series (three sizes) features magnetic shielding.

Dual Inductors for Class-D

Coilcraft offers a unique selection of dual inductors that significantly improve performance and reduce board area with a compact, single shielded package. Good linearity and ultra low total losses minimize total harmonic distortion plus noise (THD+N). With no crosstalk between windings, their high efficiency makes them ideal for use in handheld audio devices, portable docking stations, high-end TV soundbars, active speakers and subwoofers and automotive stereo audio systems.

Common Mode EMI/RFI Filters

Coilcraft offers EMI/RFI common mode chokes for the suppression of radiated and/or conducted EMI. Data/signal line filters such as our **USB** Family dramatically suppress common mode noise with minimal impact on high-speed differential signals. The **PFD**, **LPD** and **MSD** parts can be used to attenuate common-mode or differential-mode noise in both data and power line applications. Power line chokes like the **CMT** and **BU** Series reduce common mode noise from AC power.

Data Line Common Mode EMI Chokes

The **CJ5100**, **CQ7584**, and **CR7856** surface mount data line common mode chokes are designed to attenuate up to 100 MHz common mode noise. The **PDLF** Series can reduce noise by a factor of 32 from 15 MHz to 300 MHz and are available in 2, 3 and 4 line versions. The **PTRF** Series is optimized for FCC and ITU-T (formerly CCITT) requirements. These parts provide 15 to 25 dB attenuation, greater than 1000 Ohms impedance and 1500 V isolation between windings. **M2022** can suppress common mode noise up to 500 MHz in a compact 1812 package.

High-Speed Data Line EMI Chokes

Coilcraft's **RA6870**, **CM1394** and **USB** Families of high-speed data line common mode chokes effectively reduce common mode noise in high-speed interfaces like USB 2.0, USB 3.1 Gen 1, HDBaseT™, MOST® bus, etc. They maintain excellent signal integrity for high-speed communications with the -3dB differential mode cutoff frequency up to 6.5 GHz. Most provide greater than 30 dB common mode attenuation at 500 MHz and 25 dB in the GHz band.

Data / Power Line Common Mode EMI Chokes

The **LPD**, **MSD** and **PFD** Families are low profile, miniature footprint common mode chokes that can be used to attenuate common mode noise or differential mode noise in both data and power line applications.

Surface Mount Power Line Common Mode EMI Chokes

Coilcraft's low-cost, high-performance surface mount power line common mode chokes come in a variety of sizes and packages. They are designed to eliminate AC line conducted common mode noise across a broad range of frequencies, with up to 1500 Vrms isolation. These common mode chokes can operate for a wide range of current from 0.06 Amps to 15 Amps, providing attenuation where line filtering is needed, such as in switch-mode power supplies.

Through-Hole Power Line Common Mode EMI Chokes

Coilcraft's low-cost through-hole **BU** Series high efficiency choke coils are designed to eliminate line conducted common mode noise across a broad range of frequencies. The **BU9S** and **BU9HS** are ideal for signal line applications; the other BUs can be used in switching power supplies and power supply circuits. For low profile applications, the **BU9** and **BU9S** filters are available in a horizontal configuration that reduces their height to under half an inch (12.5 mm).

CMT Common Mode EMI Chokes

Coilcraft's CMT toroid style common mode chokes are designed to provide the highest common mode impedance over the widest frequency range. These parts are ideal for any application requiring a high DC current bias and are well suited for use in switch-mode power supplies. These common mode chokes are most effective in filtering supply and return conductors with in-phase signals of equal amplitude. Differential mode inductors are available for filtering out-of-phase or uneven amplitude signals.

Wirewound Ferrite Beads

Coilcraft offers a broad range of wirewound ferrite beads in standard package sizes from 0201 (0603) to 1812 (4532), all offering better attenuation and frequency performance than traditional thick-film chip ferrite beads.

Coilcraft wirewound ferrite beads feature a ferrite construction and heavy gauge wire for high current handling. They provide extremely low DCR while maintaining high filtering impedance across a wide bandwidth – up to GHz band. These features enhance the performance of choke circuits while reducing board space by replacing a larger chip ferrite bead with an equivalent, or higher-performing wirewound ferrite bead.

Figures 1 and 2 illustrate the superior broadband performance of Coilcraft wirewound ferrite beads compared to both low- and high-DCR chip ferrite beads. .Learn more about Coilcraft wirewound ferrite beads, and find the best part for your application at **www.coilcraft.com/ferritebead**.

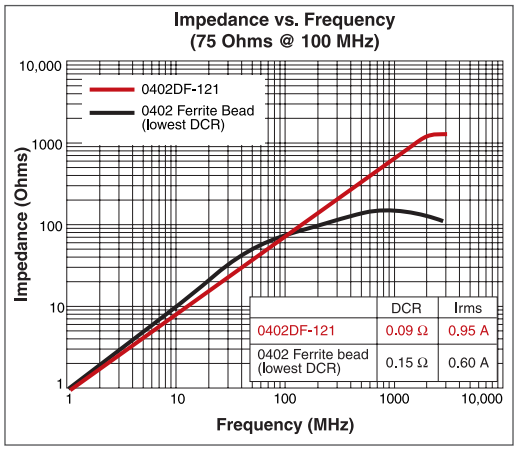

Figure 1: Coilcraft 0402DF-121 wirewound ferrite bead vs. lowest-DCR 0402-sized chip ferrite bead

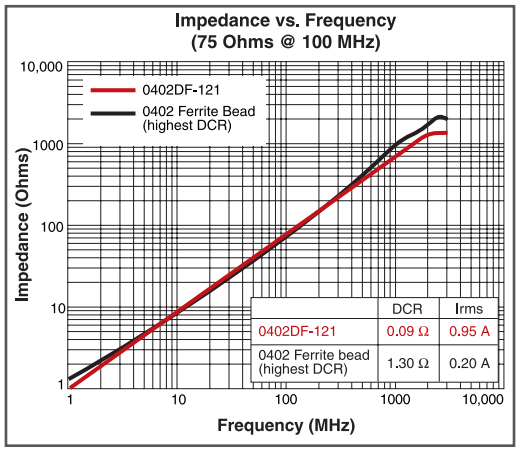

Figure 2: Coilcraft 0402DF-121 wirewound ferrite bead vs. typical high-DCR chip ferrite beads

The Ultimate Kit for Antenna Matching

Why do so many users love our new 0402DC Series Ceramic Chip Inductor Designer's Kit? To start, the 0402DC Series provides the industry's highest Q factors in its size to achieve super low loss in high frequency circuits.

The 0402DC is also offered in 112 inductance values from 0.8 to 120 nH – **including 0.1 nH increments between 2.8 and 10 nH!**

And, with 20 samples of every value, the C472-2 Kit is the perfect resource when you're designing impedance matching circuits for antennas in both lowband (700 – 960 MHz) and highband (1710 – 2700 MHz) applications.

Other features of the 0402DC include:

- Wirewound construction for extremely high SRF – up to 16 GHz
- DCR as low as 37 mΩ, significantly lower than other 0402-sized chip inductors

Order your C472-2 Designer's Kit directly on coilcraft.com!

Designer's Kits

To simplify your prototyping, we offer low cost Designer's Kits for many of our products. Each has an assortment of standard values along with detailed product specifications. We even offer free refills for the parts you use most often. To purchase, call **800-322-2645** or order your kits on-line at **http://www.coilcraft.com/kits**.

Kit M100
"Unicoil" 7/10 mm Tunable Inductors
Kit M302
"Unicoil" 5 mm Tunable Inductors
Kit M305

EMI/RFI Filters

Common Mode Data Line EMI Filters
Kit D303
Common Mode Line Chokes
Kit P402

Power Inductors

DC1012 Series
Kit P410
PCV Series Power Filter Chokes
Kit P405
PCH27, 45 Series Axial Lead Power Chokes
Kit P409

Power Magnetics

Current Sensors
Kit P403
Base/Gate Driver Transformers
Kit P404
