Classification REFERENCE SPECIFICATION	Issue No. 20180840
Part Name 6mm Square Thin Type SMD Part No.	1 / 8
Light Touch Switch EVQ7Q202W	1 / 0
1. Notification Items	
1.1 Law and the regulation which are applied	
① Ozone depleting substances specified by Montreal Protocol have not been used in the manufactu	rıng
process of the material used in this product. ② This product complies with RoHS Directive (on the restriction of the use of certain hazardous su	hatanaaa
in electrical and electronic equipment) (2011/65/EU).	ostances
③ The materials used in this product contain only the substances listed in the List of Existing Cherr	vical Substances
specified in 'Act on the Evaluation of Chemical Substances and Regulation of Their Manufactur	
④ Permission must be obtained from the Japanese government if the product that is subject to	
"Foreign Exchange and Foreign Trade Law" is to be exported or taken out of Japan.	
1.2 Application Limits	
The following shall be described for safety precaution:	
[Limitation of Application]	
(a) This product has been designed and manufactured for general electronic devices,	
such as home electronics, office equipment, information devices and communication dev	ices.
(1) This product is not intended for use in more sophisticated applications which require a	
and more reliability, including if a failure or malfunction may cause bodily injury or pr	• • •
(2) If the product is intended for more sophisticated applications prior approval must be of	
Such applications shall include, but are not limited to, the following: aircraft equipment	
aerospace equipment, disaster prevention equipment, crime prevention equipment, mea transportation equipment (such as vehicles, trains, ships, etc.), and information pro-	
that are highly publicized, and other equivalent equipment.	cossing equipment
(b) Regardless of its applications, in an event that this product is used for equipment with	n high safety
standards, protective circuits or back up circuits must be used and safety tests must b	
1.3 Handling of reference specification.	
• Since the contents of this reference specification are subjected to change without	
prior notifications, please request us a formal specification again for your investigations	
before using.	
1.4 Manufacturing Sites	
The country of manufacture : Malaysia Panasonic Industrial Devices Malaysia Sdn. Bhd.	
2. Summary	
2.1 This specifications applies to the following types of switch.	
Push-ON type S.P.S.T	
2.2 This specifications is a constituent document of contract for business concluded between	
your company and Panasonic Corporation.	
2.3 Items not particularly specified in this specifications shall be in conformance with JIS Standa	rds.

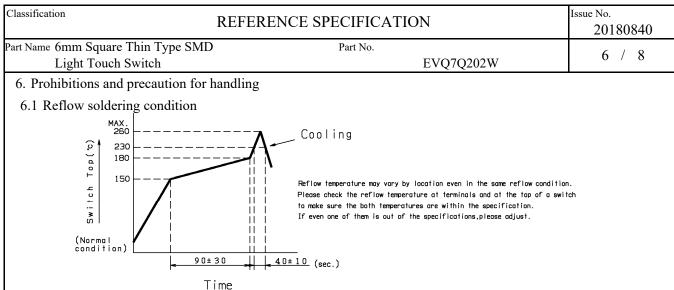

Panasonic Corporation

Classification	REFERENCE SPECIFICATION	Issue No. 20180840
Part Name 6mm Square Thin Type SM Light Touch Switch	D Part No. EVQ7Q202	2W 3 / 8
4. General specification		
4.1 Switch rating	DC 15 V 20 mA(max.) DC	2 V 10 µA(min.)
4.2 Operation temperature range	\sim -40 \sim + 85 °C	
4.3 Preservative temperature ran	ge Single condition : - 40 \sim + 85	5 °C
	Taping condition : - 20 \sim + 60)°C
4.4 Standard conditions		
Unless otherwise specifi	ied, the test and measurements shall be carried out	as follows.
Ambient temper	rature : 5 \sim 35 $^{\circ}\mathrm{C}$	
Relative humidi	ity : $45 \sim 85 \%$	
Atmospheric pro	essure : $86 \sim 106$ kPa	
However, if doubt arises	s on the decision based on the measured values	
under the above-mentior	ned conditions, the following conditions shall be e	mployed.
Ambient temper	rature : $20 \pm 2 $ °C	
-	ity : 65 ± 5 %	
Atmospheric pro	essure : $86 \sim 106$ kPa	
5. Performance		
5.1 Electrical characteristics		
No. ITEM	TEST CONDITION	PERFORMANCE
511 Contact Duch for	$race : (Operation force) \times 2$	100 mO max

No.	ITEM	TEST CONDITION	PERFORMANCE
5.1.1	Contact	Push force : {Operation force} $\times 2$	100 m Ω max.
	resistance	Measurement tool : Contact resistance meter	
		(Capable of 10 μ A \sim 10 mA)	
5.1.2	Insulation	DC 100 V (Between terminals)	100 M Ω min.
	resistance		
5.1.3	Withstand	AC 250 V for 1 minute. (Between terminals)	No insulation
	voltage		destruction
5.1.4	Bouncing	Operation speed : $3 \sim 4$ times/s	ON
		D. C. 10V	10 ms max.
			OFF
		1mA Oscillo scope	10 ms max.
		Switch Bouncing Test Circuit	

ssification	n	REFERENCE SPECIFICATION	Issue No. 2018084	
	mm Square Thin Ty ight Touch Switch	pe SMD Part No. EVQ7Q202W	4 / 3	
	chanical characteri			
No.	ITEM	TEST CONDITION	PERFORMANCE	
5.2.1	5.2.1 Operation force		Push force $0.8 \stackrel{+}{_{-}} \stackrel{0.25}{_{-}} N$	
		Bin Return force	Return force 0.1 N min	
5.2.2	Travel to closure	Stroke	$0.2 \stackrel{+}{_{-}} \stackrel{0.1}{_{-}} \mathrm{mm}$	
5.2.3	Push strength	50 N for 60 sec. \mathbf{F}	No damage (Electrical and mechanic	
5.2.4	Vibration test	 Amplitude : 1.5 mm Sweep rate : 10-55-10Hz for 1 minute Sweep method : Logarithmic frequency sweep rate Vibration direction : X,Y,Z(3 directions) Time : Each direction 2 hours (Total 6 hours) 	No.5.1 and 5.2.1 to 5.2.2 shall be satisfied.	
5.2.5	Soldering heat test	Mount the switch on P.W.B by solder paste.1) Reflow process 2 times. (Refer to section 6.1)2) Standard conditions after test : 1 hours	Contact resistance 100 m Ω max. No.5.1.2 to 5.1.4 and No.5.2.1 to 5.2.2 shall be satisfied.	
5.2.6	Solderbility	After spreading flux, the terminal is immersedin solder with following condition.Solder bar: M705/Sn-3.0Ag-0.5Cu (Senju Metal Industry Co.,Ltd.)Flux: CF-110VH-2A (tamura kaken)Soldering temperture: 260±5°CSoldering time: 2±0.5 sec.	95% or more of surfact area(Excluding rupture surface)where is immersed in solder shall be covered by ne solder.

			be within	± 30 % to the
			value bef	ore testing
			No.5.1.2	and 5.2.2
			shall be sa	tisfied.
5.3	3.6 Withstand H_2S	1) Density : 3±1ppm	Contact r	esistance
		2) Temperature : 40 ± 2 °C	200 mΩ r	nax.
		3) Relative humidity : $80 \sim 85 \%$	No.5.1.2	to 5.1.4 and
		4) Duration of test : 24 h	No.5.2.1	to 5.2.2
		5) Standard conditions after test : 1 h	shall be s	atisfied.

- 1) Two times max. with directing the switch mounting side of P.W.B up.
- 2) Re-soldering by soldering iron shall be allowed under 350 °C max. 3 sec. max. 1 time only and the tip of iron must not touch to terminals.

Soldering iron for re-soldering have to be 60 W max.

- 6.2 Design instructions
 - 1) Please refer to the land pattern plan Panasonic recommends on the 2nd page.
 - 2) Design key top as fig-1. Design inclination of key top 4 deg. max. as fig-2.Deviation between center of key top and switch should be within 0.3 mm. (Recommended operation condition)

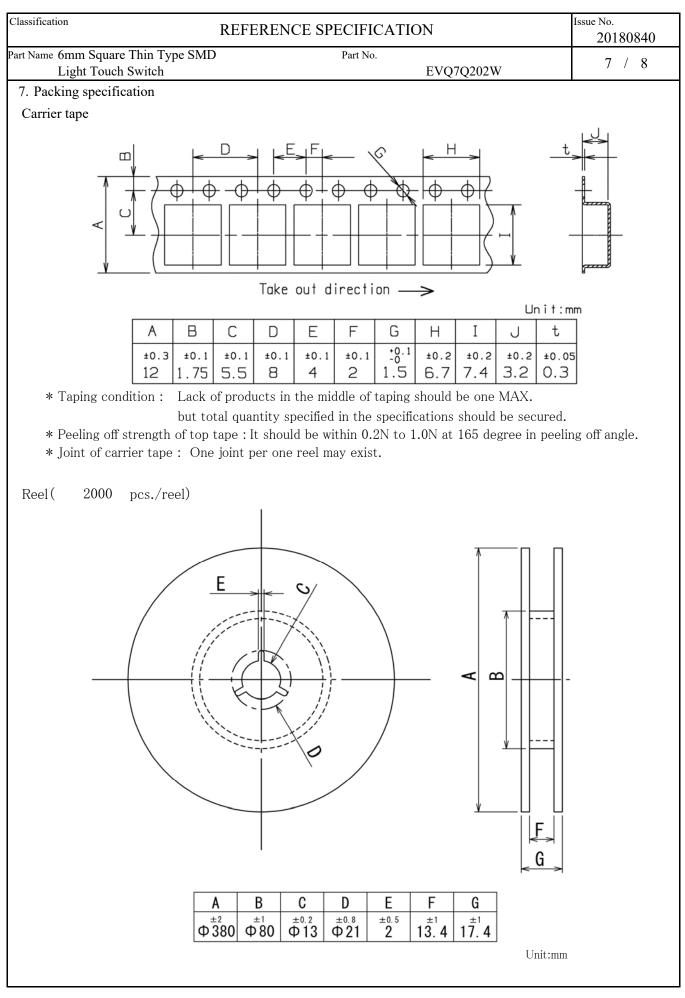

6.3 Note

- 1) Please be cautions not to give excessive static load or shock to switches.
- 2) Please be careful not to pile up P.W.B. after switches were soldered.
- Preservation under high temperature and high humidity or corrosive gas should be avoided especially. When you need to preserve for a long period, do not open the carton.
- 4) Cleaning
 - If flux or solder is scattered on the surface of P.W.B when soldering, characteristics of this product may be damaged.
 - Cleaning after soldering is not allowed. When cleaning is required this switch should be soldered after the cleaning.
- 5) Avoid the use of the switch under pushed ON condition is continued for a long time.
- 6) There is a possibility the flux from solder paste infiltrates into the body if plenty of solder paste was applied by switch on the P.W.B.

So we recommend to use our proposed land design in order to prevent above problem.

Also please avoid putting additional land by the switch on the P.W.B.
